MOONLIGHT SAIL

1971 goes down in climatological history as the year that June traded weather with August. PVS, quick to take advantage of Mother Nature's every foible, has scheduled a beautiful June night, full moonlight sail for Saturday, August 7. Schooners Warlock and Rebel and Sloop Largus set sail from Port Owens Marina, Pasadena, Maryland at noon and return at midnight. Sailing will be uninterrupted as a sailor's supper of hardtack and bully beef will be served aboard. For those not quite so salty, there will be Boeuf Bourguignon with all the trimmings. PVS will supply beer and soft drinks at 25¢ each. Save the date and \$15.00 and clip the coupon in the July "TOOT". If you have any questions call Doris Jones--office 496-4108, home--585-6975.

SKI INJURY STATISTICS

Seven years of studies of ski injuries have led to the conclusions that ski injuries are related to individual skier ability, sex and age. The likelihood of injury decreases with advancing age and with greater skiing ability. Women have injury rates nearly twice those of men of comparable ability. The types of injuries suffered are about the same for skiers of either sex and of varying abilities. So, if you are a young woman novice skier, be careful!
